List of Examples	9
Preface	10
What's in this guide?	10
Who should read this guide?	10
Related documentation	10
Introduction	12
Terminology	12
Organization of settings files	12
Namespaces	13
Common namespace	14
Other namespaces	14
Predefined settings files	16
Where presets are installed	16
System preset information	19
Windows	19
Mac OS	20
Reading and writing settings files	20
Compatibility strategies	21
How applications handle incorrect settings files	21
How Distiller uses Adobe PDF settings	22
Distiller initialization	22
How Distiller processes PostScript files	22
Modifying settings during the job	23
Using Distiller to combine PostScript files	24
Using PDF Creation Settings	25
Using the image settings	25
Image compression settings	26
Flate	27
JPEG	27
JPEG2000	28
Automatic compression	30
Non-automatic compression	30
Color and grayscale images	30
Monochrome (black and white) images	31
Downsampling and subsampling images	31
Downsampling settings	32
Controlling the range of bit depths for which downsampling occurs	32
Setting compression of text, line art, and objects	32
Distiller-only image settings	33
Controlling bit depth	33
Specifying a minimum resolution of sampled images	34
Controlling downsampling and encoding for each sampled image	35
Disabling of image cropping	35
Using the font settings	35

Using the color conversion settings.....	36
Distiller color conversion settings.....	37
Creative Suite color conversion settings	38
Converting colors	39
Including profiles.....	39
Color settings interchange	39
When common settings are used.....	40
Saving common settings equivalents.....	41
Using the advanced Adobe PDF settings	43
Relationship between setpagedevice keys and job ticket keys	43
Relationship between PostScript comments and job ticket keys.....	44
Using the standards settings.....	44
Using the compliance checking settings	45
Using the PDF/X output intent settings	46
Distiller examples.....	48

Common PDF Settings..... 49

Settings descriptions.....	50
General settings	51
AutoRotatePages	51
Binding.....	52
CompatibilityLevel	52
CompressObjects.....	54
CoreDistVersion	55
Description	55
DoThumbnails.....	56
EndPage.....	56
ExportLayers	57
HWRResolution.....	57
